DIVISION OF WATER RIGHTS  
STATE WATER RESOURCES CONTROL BOARD

"The energy challenge facing California is real. Every California needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Web-site at <http://www.srcc.ca.gov/>"

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or Water Rights in California, and (3) Appropriation of Water in California. Write to this office. We have several pamphlets available. They include: (1) Statements of Water Division and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Proposes a new appropriation from upstream their diversions, and (3) assists the State to determine if additional water is available for future purposes with specific exceptions. The filing of a statement (1) provides a record of water use. (2) enables the State to notify such users if some one only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

An appropriate right is a surplus not needed by riparian water users. Generally, appropriate rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream.

Riparian rights may be used to divert the natural right to the served parcel. Generally, a riparian user must share the water supply with other riparian users. Reservation of the riparian right to the served parcel may never have been severed from the sources of supply by an intervening parcel without the same watershed as the water source and must never have been severed from the sources of supply by an intervening land must be in 93003 A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in 93003

There are two principal types of surface water rights in California. They are riparian and appropriate rights.

### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA (DRAFT)

Please note that my father, John, has passed away and is currently buried in Ashwood, CA. I am unable to provide any detailed information.

### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. A must be in the same water shed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statement of Water Division and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

For more detailed information, Foothill College has prepared a pamphlet entitled "Water Rights for Stockponds Constructed Prior to 1969". It is available for future appropriators.

Statements of Water Division and Use  
"Information Pertaining to Water Rights in California"  
"Water Rights for Stockponds Constructed Prior to 1969"  
"Appropriation of Water in California"

Statement of Water Division and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new water appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for appropriate users.

An appropriate right is required for use of water on nonirrigation land and for storage of water. Generally, appropriate rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

A riparian right is a surface right to the water supply within its watershed. Generally, appropriate rights may be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

Riparian rights are based on the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed. A user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian of supply by an intervening parcel as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian land must be in the same watershed as the water source and never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian

DATED: May 4, 1991 at Tracy, California

Signature: Lester H Krohn

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus of water. Riparian rights are needed by riparian users. Since 1914 new appropriators have been required to obtain a permit and license from the State. An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus of water. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus of water. Riparian rights are needed by riparian users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Appropriative rights enable users to withdraw water from a stream or body of water upstream from their diversion, and (3) assists the State to determine if additional use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional use is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Information Pertaining to Water Rights in California", "Water Rights for Stockpond Construction Prior to 1969", "Water Appropriation of Water in California", "Statement of Water Diversion and Use", and "Water Distribution and Use".

STATE WATER RIGHTS BOARD

STATEMENT OF WATER DIVERSION AND USE

*This statement should be typewritten or legibly written in ink.*

S 1027

- A. Name of person diverting water Lester H. Krohn  
Address 15120 West Finck Road, Tracy, California 95376
- B. Name of body of water at point of diversion Old River  
Tributary to \_\_\_\_\_
- C. Place of diversion 1/4 1/4 Section 2, Township 25, Range 4E, M.D. pxM,  
San Joaquin County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.
- D. Name of works \_\_\_\_\_
- E. Capacity of diversion works Unknown  
Capacity of storage reservoir \_\_\_\_\_  
State quantity of water used each month in gallons or acre-feet
- | Year | Jan. | Feb. | Mar. | Apr. | May | June | July | Aug. | Sept. | Oct. | Nov. | Dec. | Total Annual |
|------|------|------|------|------|-----|------|------|------|-------|------|------|------|--------------|
|      | +    | +    | +    | +    | +   | +    | +    | +    | +     | +    | +    | +    |              |
- If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc. 51 acres Barley,  
27 acres Sugar Beets, 47 acres Tomatoes, 36 acres Orchard, and 138 acres Alfalfa.
- Maximum annual water use in recent years Unknown  
Minimum annual water use in recent years Unknown  
Type of diversion facility: gravity pump +  
Method of measurement: weir flume, electric power meter water meter, estimate estimate
- F. Purpose of use (what water is being used for) Irrigating crops

G. General description or location of place of use (use sketch of section grid on reverse side if you desire) .8 mile South of Finck-26 Miles West of Tracy Road on that portion of Union Island known as Fabian tract.

H. Year of first use as nearly as known 1919

I. Name of person filing statement Lester H. Krohn

Position owner

Organization \_\_\_\_\_

Address 15120 West Finck Road, Tracy, Calif.

I certify that the foregoing statement is true and correct to the best of my knowledge and belief.

Date signed 6/9/67

Signature Lester H. Krohn
